

FileMaker 16 Platform

Create custom apps for iPad, iPhone, Windows, Mac, and the web

FileMaker Pro 16

What is it: FileMaker Pro 16 is simply powerful software used to create custom apps that work seamlessly across iPad, iPhone, Windows, Mac, and the web. Start managing contacts, inventory, projects, and more!

Who uses it: Businesses, nonprofit organizations, educational institutions, and departmental teams. Anyone can create a custom app – even those without extensive development experience or IT skills.

What is it used for: To create, manage, and share information with your team.

- Create custom apps for iPad, iPhone, Windows, Mac, and the web.
- Run your apps on Windows and Mac computers.

FileMaker Pro 16 Advanced

What is it: FileMaker Pro 16 Advanced includes all the features of FileMaker Pro 16 plus a suite of advanced development and customization tools.

Who uses it: People who want more tools to help them design and maintain custom apps for their team.

What it is used for: To build more powerful and flexible custom apps faster.

- **Design and develop custom apps** more quickly with Custom Menus, Custom Functions, and more.
- **Monitor more efficiently** using the interactive Script Debugger and powerful Data Viewer.
- **Modify and maintain apps** with ease using the advanced Database Design Report and Multiple Table Import.

FileMaker Go 16

What is it: FileMaker Go 16 runs custom apps on iPad and iPhone. Available on the App Store.

Who uses it: Anyone who wants to easily share information with their team while on the go.

What is it used for: To accomplish a variety of mobile tasks such as checking inventory in the warehouse, creating invoices during client visits, performing inspections onsite, and more.

FileMaker Server 16

What is it: FileMaker Server 16 is fast, reliable server software. Includes FileMaker WebDirect, an innovative web technology that instantly runs your custom apps directly in a web browser.

Who uses it: People who want 24/7 availability and reliability, the ability to remotely manage apps with ease, and to save time by automating administrative tasks.

What is it used for: To securely share your custom apps with groups of FileMaker Pro, FileMaker Go, and FileMaker WebDirect users.

New! FileMaker Cloud

What is it: FileMaker Cloud provides secure, reliable access to your custom apps in the cloud.

Who uses it: People who want the simplicity and performance of the FileMaker Platform without having to deploy and maintain a server.

What is it used for: To easily share information with your team in the cloud.

What's New

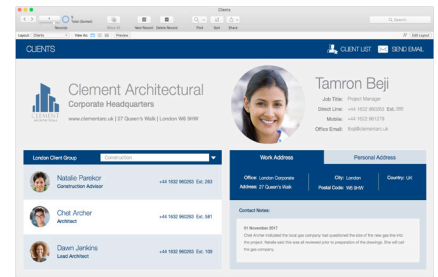

Top New Features in FileMaker Pro 16 and FileMaker Pro 16 Advanced

Build powerful custom apps in less time.

- **Layout Objects window** – View a hierarchical list of all objects on a layout. Select, hide, and name objects, as well as change the stacking order.
- **Cards** – Create a window that allows users to open other windows or files without having to first close the card.
- **New FileMaker Pro interface on Windows OS** – Get a more native Windows OS experience with a brand-new user interface.
- **Copy and paste value lists** – Use standard keyboard shortcuts to copy and paste value lists.
- **Variables in FileMaker data source references** – Dynamically open hosted FileMaker files by specifying a variable when choosing a file path.
- **Enhanced cURL options** – Easily exchange data with other web services and applications.
- **JSON functions** – Use predefined functions to simplify parsing and generating JSON data requested from other data sources.
- **External script steps** – Extend the capabilities of third-party plug-ins with support for external script steps.
- **Clickable security lock icons** – Click the lock icon to get more details about the security of your network connection.
- **Field-level text encryption** – Ability to encrypt text in a field.
